This memorandum is forwarded in answer to the referenced requirement concerning the Ulan Ude Airframe Plant #99.  2. This study was conducted utilizing photography from The selection of This study was made by screening all available photography over this installation and using the latest date photography which best maintained a high degree of image quality.  3. Ulan Ude Airframe Plant #99 is located 6 nm TME of Ulan Ude Railroad Station. The coordinates are 510 51'N - 1070 45'E.  The limits of the plant are outlined in Figure 1. Photography from hows the plant containing a total estimated roof cover of 1.040.32'S square feet. All buildings within the plant were included in the estimate; however, only the major buildings were annotated. Ulan Ude Airfield is adjacent to the plant on its western edge. The field is used primarily as a test and flyaway facility. The small scale of the photography precludes definite identification of some buildings, security, entrances, and the location of rail spurs within the installation.  A. The photo analyst for this project was project. This memorandum with enclosures completes the referenced requirement.
